

The Hexagram symbol around the All Seeing Eye of Light and enclosed by a circle including six crosses at each point outside the circle, composes the seal of the Ordo Luciferi. The Hexagram is a potent symbol of the macrocosm and Higher Energies, and its relations to the microcosm and manifest energies.

The triangle is a sacred geometrical form that symbolizes, trinity. Within the Ordo Luciferi, the trinity is made manifest by the threefold existence of the Body, Mind and Soul (Energy Being) of each individual. The triangulum also alludes to the formula of “Thesis + Antithesis = Synthesis” and thereby, the Triangle alludes to a synthesis of total being. Wherein 1+1 does =3. Pythagorean three means completion, in Taoism, the Tao beget One, and One beget two and Three beget all things. In Hermeticism, the Thrice Great, ‘Trismegistus’ and the three prima materia of Salt, Sulphur and Mercury. Three is a powerful number, for in three doeth symbolize manifestation into the physical, as well as fortitude, strength, power, knowledge and Higher Understanding.

The upright triangle alludes to solar powers, light, force, masculinity, and fire.

The inverted triangle alludes to lunar powers, darkness, grace, femininity and water.

Each being be they male or female is genetically and chemically composed of both male and female qualities.

By the intertwining of the upright and inverted triangulum's doth we hold before us, the completion of Self-Unification.

The Hexagram itself is composed of two intersecting equilateral triangles, the upright triangle, points upward and representing the Higher Energies. The higher faculties of existence, including but not limited to Higher Conscious, Higher Being and the Higher Self. It represents the ascension of the body, mind and soul, the trinity of the human genus ascending into its higher states. Likewise, in contrast the inverted triangle represents the dissension into the lower realms of existence, base, manifest energies. Thus, the hexagram in part represents the hermetic axiom of "That which is Above, is as that which is Below. The Hexagram, depicts the unity of the Heavens (Macrocosm) and Earth (Microcosm).

The Hexagram also composes the four elements of Fire, Water, Earth and Air. Thus giving the magus the power of manifestation by the higher understanding and control of the elements.

\triangle = FIRE ∇ = WATER ∇ = EARTH \triangle = AIR

Therein the Hexagram is the number 6, the number of equilibrium and balance. $1+2+3=6$. It represents the union of polarity. Six is the number of humanity. In the kabbalah it is Tifereth, the Sephiroth equating to the Sun, Harmony, Beauty, Perfection, Unity and Creation.

The Sun, represents the Light, and all things of this Earth are composed of the Sun's Energy and Light. In the center of the seal, is the Eye of Lucifer, that All Seeing Eye that permeates and penetrates every solid and intangible thing. Within the seal the circle with a point in the center (Eye) represents the presence of Intellectually Focused Light and Energy. The Light of Intellectual Illumination, the mind that through the formulae of the seal in all its points, accomplishes the great work and great vision of the hidden mysteries. The All Seeing Eye not of two, but of one. In the body, mind and soul of humanity exist a great spirit, a great vision of manifest perfection.

The circle closes the seal, secures its power, and encompasses all the points into one ideology of Luciferian Principles for Conscious Evolution. The six crosses surrounding the outermost circumference of the circle represent the six degrees of the structure, and the principles embodied by each degree of manifestation.

The six degrees are the Incipus I° at the bottom apex, the top left point is resident to the Adeptus II°, the top right to the Magus III°, and this completes the inverted trinity. The top apex is the point of the Illuminatus VI°, the bottom left, that of the Animus V° and the bottom right the point of the Primus IV°, thereby completing the upright triangulum. Noting that all degrees are necessary toward the completion of the seal and the Order.

The Ordo Luciferi seal was derived by implementing the characteristics of the Seal of King Solomon. Solomon is known to have been given both “wisdom and knowledge”, thorough understanding of the universe was he a great King and great Magi. King Solomon’s Seal, whose base is on the ground and whose tip reaches toward the stars, symbolizes a harmony of opposites, whose significance is manifold as much as it is multi-cultural. It reflects the cosmic order, the skies, the movement of the stars in their spheres, and the perpetual flow between heaven and earth, between the elements. The Seal, therefore, symbolizes super-human wisdom, a blazing star of genius that is Self-created, governed, and attained by its illuminated intelligence.

To all of which, this Seal forebears, the bright and shining Six Rayed Star of Lucifer and Humanity embodied within the Luciferic Principles of Illumination. It is a seal of family, a brotherhood and sisterhood of Light, it is a seal of all time, the Age of Light. It is a seal of the Luciferian, it is the seal of an Illuminatus.
